About **What is a Banksman?**

Traffic marshal (Banksman) are operatives trained to direct vehicle movement on or around site. They are often called Traffic Marshals

Can we still use Banksmen for Reversing Vehicles?

Yes, but only if trained and authorised. There is a hierarchy of control, which places segregation at the top. Banksmen should only be used in circumstances where other control measures are not possible.

How Can We Keep Banksman Safe?

Ensure that they are trained and competent to direct moving vehicles

Provide a protected position from which they can work in safety

Provide distinctive 'hi viz' clothing for identification

Tell drivers that if they can't see the Banksman they should stop immediately

Agree on the use of standard signals

What's The Problem?

Every year, about 50 people are killed and more than 5000 people are injured in accidents involving workplace transport (www.hse.gov.uk/statistics). The most common causes are people falling from or being struck by a vehicle, objects falling from a vehicle, or vehicles overturning.

Nearly a quarter of all deaths involving vehicles at work occur during reversing. Many other reversing accidents do not result in injury but cause costly damage to vehicles, equipment and premises. Most of these accidents can be avoided by taking simple precautions, which will be explained during the course.
